Environmental Quality Assurance Workshops

ASI Course #107 – “Basic Environmental QA/QC Workshop – Chemistry”

ASI Course #108 – “Advanced Environmental Chemistry QA Workshop, including Detecting Improper Practices”

Both Courses will be conducted by Marlene Moore of Advanced Systems, Inc. of Newark, Delaware. Ms. Moore is a recognized authority in quality systems for laboratories and sampling operations, including ISO 9000 compliance. She is a registered RAB ISO QSM auditor and routinely works with consultants, contractors, regulators and industry to insure integrity and understanding of their environmental analytical programs.

DAY 1 – FEBRUARY 19TH – ASI #107 BASIC WORKSHOP

- QA application, documentation & principles
- QC protocol (spikes, standards, statistical analysis, control charts, logbooks)
- General chemistry principles (gravimetric, titration, colorimetric, instrumentation, extractions, digestions)

DAY 2 – FEBRUARY 20TH – ASI #108 ADVANCED WORKSHOP

- QA review (application & examples)
- QC protocol (batch control, measurement uncertainty, standards)
- Chemistry principles (calibration & verification, spectrometry data review, chromatography data review, integration practices)
- Detecting and preventing improper practices (ethics training, data transfer methods)

0800-0830 Registration
0900-1130 Workshop Instruction
1130-1230 Lunch (provided)
1230-1630 Workshop Instruction

- Continuing Education Credit Application pending with MDEQ
- Holiday Inn West, Livonia. Class sizes will be limited!
- Estimated program cost: \$130 for one day, \$210 for both days
- Email information@rtilab.com or call 734-422-8000 x220 to make your registration.
